INTRODUCTION

The Energy Research Information System (ERIS) is a service administered by the Old West Regional Commission in response to the need for current information on research activities in the region's rapidly growing and changing field of energy. Cooperating with the Commission on ERIS are the U.S. Geological Survey and Argonne National Laboratory.

The purpose of ERIS is to compile and make available to the users in the Region an up-to-date inventory of ongoing and recently completed energy-related research projects.

The term "energy-related" covers a broad spectrum of activities and encompasses a large volume of research. Nonetheless, ERIS attempts to report energy-related research projects in as comprehensive a manner as possible. The subject areas covered are: reclamation, energy conversion, and land use research, socioeconomic impact and renewable energy resources studies, as well as programs related to energy development which do not necessarily involve research.

By facilitating communication among researchers and allowing public and private sector decision-makers access to Regional energy research, ERIS aims to improve information exchanges among energy research users. The system can be used as an aid in conducting research, avoiding duplication of effort, and pinpointing areas of additional research need.

The geographical focus of ERIS is the Old West Region--Montana, Nebraska, North Dakota, South Dakota, and Wyoming. However, peripheral states or nationwide efforts are covered as they are related to regional work.

The compilation of energy research projects in the ERIS reports has been accomplished by combining ERIS's own information-gathering efforts with those of other clearinghouses--most notably, Oak Ridge National Laboratory, the Smithsonian Science Information Exchange, the Montana Energy Office, the North Dakota Regional Environmental Assessment Program, the University of Wyoming, Rocky Mountain Institute on Energy and Environment and other energy agencies in the Old West Region.

Use of the Energy Research Information System

ERIS Projects Reports

ERIS information is stored in a computerized data base. As the data base grows, periodic reports are printed which list the latest contents of the data base. The first such report was issued in November, 1975.

Access to ERIS is available through subject oriented sections and through the indexes located at the end of the listings. These indexes are: Location, Personal Name, Organization, and Subject Keyword. Instructions for the use of the indexes precede each section.

Please note that ERIS provides a listing but not the actual document referred to in the publication section of each abstract. Document delivery is best accomplished by contacting the local library system or by contacting the investigator or sponsor of any particular project.

V

All ERIS listings are available from the ERIS staff or from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161

Computer Search Service

The holdings of ERIS are computerized, allowing for flexibility in conducting special searches of the data base. The computer search service is offered as a complement to the ERIS Projects Reports. If your inquiry concerning energy research cannot be answered by manual use of the reports, contact a member of the ERIS staff and request that a special search be conducted.

ERIS is part of the Research in Progress File (RIP) and the Energy R&D Project File (ERD) of the U.S. Dept. of Energy's RECON Information Retrieval System. Designated RECON users may also access ERIS through their own terminals.

Please direct your inquiries to: ERIS,
Old West Regional Commission,
228 Hedden-Empire Building, Billings, MT 59101
406/657-6665 (commercial) or 585-6665 (FTS)

The Old West Regional Commission is a Federal-State partnership designed to address regional economic problems and stimulate orderly economic growth in the states of Montana, Nebraska, North Dakota, South Dakota and Wyoming. Established in 1972 under the Public Works and Economic Development Act of 1965, it is one of eight such commissions in the United States.

The Land Reclamation Program at Argonne National Laboratory is conducting coordinated applied and basic research into the physical and ecological problems of land reclamation related to surface mining of coal and developing cost-effective techniques for reclaiming/rehabilitating mined coal land to productive end uses. The purpose of this program is to conduct integrated research and development projects focused on near- and long-term reclamation problems in all major U.S. coal resource regions including Alaska and to coordinate, evaluate, and disseminate the results of related studies conducted at other research institutions.

The function of the Water Resources Division of the Geological Survey is to provide data and reports on the availability and quality of water required for conversion of coal and oilshale to other forms of energy, to monitor the effects of mining and related developments on regional water systems, and to conduct investigations and research in methods of measuring and predicting the effects of mining and associated operations on local and regional water users.

11

HOW ERIS IS ORGANIZED

- PROJECTS REPORTS (formerly called Quarterly Reports) contain descriptions of energy research in the Old West Region.
- Each REPORT is indexed according to Location, Name, Organization, and Subject.

- CUMULATIVE INDEXES are provided once a year to incorporate previous indexes of the year's PROJECTS REPORTS under one cover.
- Project descriptions are not included with the Cumulative Index.
- CUMULATIVE INDEXES and the year's PROJECTS REPORTS comprise a set of information.

VOLUME ONE

Vol. 1, No. 1 (Nov. 1975)

REPORTING FORM ENERGY RESEARCH INFORMATION SYSTEM Old West Regional Commission

INSTRUCTIONS: Please complete the relevant categories of the Reporting Form for each energy-related project currently being conducted or recently completed by your organization in the States of the Old West Region. If an umbrella project covers several separate studies, fill out a form for each one, as well as for the umbrella project. If you want any of the information you provide to be omitted from ERIS publications, make a note of this in Category 17, "Special Instructions for Proprietary Information."

In order to assist us in assigning keywords for computer access to your research information, we ask that you circle the most descriptive words and phrases of the Title and Abstract. If necessary, add additional terms of your own choosing.

If you are amending previously submitted information, please note this on the Reporting Form.

PLEASE RETURN COMPLETED REPORTING FORM(s) TO: ERIS, OLD WEST REGIONAL COMMISSION, 228 HEDDEN-EMPIRE BLDG., BILLINGS, MT 59101. PHONE: (406) 657-6665 (Commercial) or 585-6665 (FTS).

1. Date prepared _____ Respondent _____

Check one: _____ Original Information _____ Amendment to ERIS Project No. _____

2. PROJECT/PROGRAM TITLE (circle keywords) _____

SURVEY OF PROJECTS TO EXPAND ENERGY SOURCES IN THE
WESTERN STATES

INVESTIGATORS

CHARLES M. RICH, JR.

RESEARCH INSTITUTION

U. S. BUREAU OF MINES, INTERMTN. FIELD OPERATIONS CTR.
DENVER, CO

PRIMARY SPONSOR

U. S. BUREAU OF MINES

TIME FRAME

1976 TO CONTINUING

LOCATION

STATES WEST OF THE MISSISSIPPI RIVER

ABSTRACT

THIS BUREAU OF MINES SURVEY IS AN EXPANSION AND UPDATE OF A 1976 BOM SURVEY WHICH LISTED PROJECTS TO EXPAND ENERGY SOURCES IN THE WESTERN STATES. MAPS AND TABLES LISTING THE NAME, LOCATION, AND OTHER PERTINENT DATA CONCERNING CERTAIN FUEL-RELATED PROJECTS WERE PREPARED. TABLES WERE COMPILED WHICH INCLUDE INFORMATION ON PROJECTS INVOLVING THE PROPOSED OR PLANNED DEVELOPMENT OF FUEL RESOURCES, AS WELL AS THE DEVELOPMENT OF STORAGE, TRANSPORTATION, AND CONVERSION FACILITIES. THE STUDY COVERS THE 24 STATES WEST OF THE MISSISSIPPI RIVER INCLUDING ALASKA AND HAWAII. OF THE 808 PROJECTS WHICH WERE IDENTIFIED, 219 CONCERN COAL MINES, 246 CONCERN ELECTRIC GENERATING PLANTS, AND 115 CONCERN URANIUM MINES. OTHER PROJECTS INCLUDE: COAL CONVERSION AND WASTE-TO-FUEL PLANTS; OIL SHALE AND TAR SANDS PROJECTS; GEOTHERMAL FACILITIES; NATURAL GAS PROCESSING AND STORAGE FACILITIES; OIL REFINERIES AND TERMINAL FACILITIES; RAILROADS; AND COAL SLURRY, PETROLEUM, AND NATURAL GAS PIPELINES (AS OF AUGUST 1977).

ABSTRACT

THE PURPOSE OF THE COAL TECHNOLOGY ASSESSMENT (CTA) PROGRAM IS TO COMPARE THE ENVIRONMENTAL, SOCIAL, ECONOMIC, AND INSTITUTIONAL CONSEQUENCES THAT MAY ARISE FROM THE DEVELOPMENT OF VARIOUS MIXES OF COAL-BASED ENERGY TECHNOLOGIES TO THE YEAR 2030. THE CTA IS A NATIONAL LEVEL STUDY, WITH ATTENTION ALSO GIVEN TO CERTAIN REGIONAL AND SITE-SPECIFIC CONSEQUENCES. THE OBJECTIVES OF THE STUDY ARE TO: 1) IDENTIFY COAL-RELATED ISSUES AND PROBLEMS; 2) EXPLORE POLICY OPTIONS THROUGH THE INVOLVEMENT OF INTERESTED PARTIES; 3) COMPARE CONSEQUENCES OF THE UTILIZATION OF REPRESENTATIVE CONVENTIONAL/ADVANCED COAL TECHNOLOGIES; 4) IDENTIFY GAPS IN COAL-RELATED RESEARCH PROGRAMS; AND 5) DEVELOP PROGRAMS TO COMMUNICATE RESULTS. THE ULTIMATE PURPOSE OF THE STUDY IS TO PROVIDE GUIDELINES TO POLICYMAKERS, BOTH IN EPA AND ELSEWHERE. REPORTS AND PUBLICATIONS

ABSTRACT
ICF IS PRESENTLY CONDUCTING AN ANALYSIS OF THE IMPACT OF NOT LEASING FEDERAL COAL ON THE NATION'S COAL MARKETS. ICF'S COAL AND ELECTRIC UTILITIES MODEL IS BEING USED AS THE PRIMARY ANALYTICAL TOOL. THE BASE CASE FORECASTS DEVELOPED FOR THE STUDY, THE DEMAND FOR WESTERN COAL AND ITS SENSITIVITY TO KEY UNCERTAINTIES, ARE USED IN THIS ANALYSIS. TO SIMULATE A "NO-LEASING" POLICY IN THE ICF MODEL EACH OF THE WESTERN COAL SUPPLY CATEGORIES ARE RESTRICTED TO DEVELOPABLE NON-FEDERAL COAL RESERVES (WHICH ARE AVAILABLE WITHOUT LEASING), AND ALL RESERVES ON FEDERAL LANDS ARE REMOVED FROM THE SUPPLY CURVES. A SCALING FACTOR IS USED, TO REDUCE EACH WESTERN SUPPLY CURVE IN THE MODEL BASED ON THE PERCENTAGE OF TOTAL SUB-SURFACE FEDERAL ACREAGE IN EACH STATE. MODEL FORECASTS OF REGIONAL COAL PRODUCTION, DELEVERED COAL PRICES, ELECTRICITY GENERATION COSTS, ANNUALIZED COSTS OF ELECTRICITY, ETC. WILL BE PRESENTED IN THE FINAL REPORT.
STUDY AFFILIATION
THIS PROJECT IS VERY CLOSELY RELATED TO "THE DEMAND FOR WESTERN COAL AND ITS SENSITIVITY TO KEY UNCERTAINTIES," AND IS PART OF CONTRACT NO. EJ-78-C-01-2835, TASK 4.. ENERGY RESEARCH INFORMATION SYSTEM PROJECTS REPORT, VOL. 4, NO 1, PROJECT NO. 00001370.
REPORTS AND PUBLICATIONS
THE EFFECTS OF NO FURTHER FEDERAL LEASING ON THE NATION'S COAL MARKETS. DRAFT REPORT, 1/79, ICF, INC. AVAILABLE FROM ICF, INC. AND THE U. S. DEPT. OF INTERIOR, OFFICE OF PUBLIC AFFAIRS.

ABSTRACT

ICF HAS FORECASTED AND EVALUATED EXPECTED PRODUCTION LEVELS FOR THE KEY WESTERN COAL SUPPLY REGIONS USING ITS COAL AND ELECTRIC UTILITIES MODEL. THIS PROJECT WAS COMPLETED FOR THE DEPT. OF ENERGY TO ASSESS PRODUCTION REQUIREMENTS FOR EACH OF THE WESTERN STATES IN DETERMINING A FEDERAL COAL LEASING STRATEGY. ASSUMPTIONS WERE MADE IN THE MODEL FOR THE BASE CASE FORECASTS INCLUDING KEY PARAMETERS SUCH AS CRUDE OIL PRICES, GAS PRICES, COAL LABOR COSTS, ELECTRICITY GROWTH RATES, NUCLEAR CAPACITY, ETC. IN ADDITION, A SENSITIVITY ANALYSIS WAS PERFORMED TO ASSESS THE SENSITIVITY OF WESTERN COAL DEMAND TO EACH OF THESE PARAMETERS. USING THE BASE CASE FORECASTS, ONE KEY PARAMETER (ELECTRICITY GROWTH RATE, OIL PRICES, ETC.) WAS CHANGED AT A TIME TO TEST ITS EFFECT ON THE BASE CASE FORECAST VARIABLES. THE FINAL REPORT PRESENTED A RANGE OF WESTERN COAL PRODUCTION FORECASTS AND A DISCUSSION OF THE SENSITIVITY OF THE DEMAND FOR THE FORECASTED PRODUCTION.

STUDY AFFILIATION

THIS PROJECT IS CLOSELY RELATED TO "A STUDY OF THE EFFECTS OF NO FURTHER FEDERAL LEASING ON THE NATION'S COAL MARKETS," ENERGY, RESEARCH INFORMATION SYSTEM PROJECTS REPORT, VOL 4, NO. 1, PROJECT NO. 0000 1369.

TIME FRAME

APRIL 1976 TO APRIL 1976

STATUS

COMPLETED APRIL 1976

LOCATION

MT

ABSTRACT

THE PURPOSE OF THIS STUDY WAS TO EXAMINE THE UNITIZATION CONCEPT AS IT WAS APPLIED IN RECENT YEARS TO THE GAS AND OIL INDUSTRY, WITH THE SPECIFIC OBJECTIVE OF SEEING IF THERE IS ANY APPLICABILITY TO THE RAPIDLY DEVELOPING COAL INDUSTRY IN MONTANA. RESEARCH WAS CONDUCTED TO DETERMINE IF COAL UNITIZATION HAS BEEN USED ANYWHERE ELSE IN THE NATION IN ORDER TO ASSESS THE FEASIBILITY OF APPLYING THE CONCEPT IN MONTANA IN THE MINING OF COAL.

LOCATION

63 COUNTIES IN MONTANA, WYOMING, SOUTH DAKOTA, NORTH DAKOTA

ABSTRACT

BECAUSE OF THE COMPLEXITY OF MINING AND RECLAMATION AT TODAY'S LARGE SURFACE COAL MINES, A COMPUTERIZED RECLAMATION PLANNING SYSTEM IS NEEDED TO MAKE THE LAND MANAGER'S JOB EASIER. SUCH A SYSTEM HAS BEEN DEVELOPED AT MONTANA STATE UNIVERSITY.

THE COMPUTER REQUIRES ENVIRONMENTAL BASELINE DATA THAT ARE KNOWN FROM MUCH PRACTICAL EXPERIENCE TO BE CRITICAL IN PREPARING A RECLAMATION PLAN. THE COMPUTER THEN MUST ANALYZE THE DATA USING A SET OF PROGRAMMED RECLAMATION ASSUMPTIONS, AND RANK FIVE POTENTIAL POST-MINING LAND USE OPTIONS BY THEIR RELATIVE FEASIBILITY AND ECONOMY. THE OPTIONS, WHICH COINCIDE WITH FEDERAL AND STATE RECLAMATION REGULATIONS ARE: NATIVE PLANT PRODUCTION, CROPLAND, WILDLIFE MANAGEMENT, OUTDOOR RECREATION, AND INTENSIVE HUMAN OCCUPANCY. THE LIST OF PROGRAMMED ASSUMPTIONS IS BASED ON STATUTORY CONSTRAINTS AND PROVEN TECHNIQUES WHICH PROVIDE RELIABLE RESULTS. THE MANAGER THEN CHOOSES WHICH LAND-USE OPTION HE DESIRES, AND THE SYSTEM WILL PRINT THE SPECIFIC TECHNIQUES, WITH COSTS, FOR ACHIEVING THAT GOAL. TECHNIQUES AND COSTS ARE BASED ON EXPERIENCE FROM OPERATING MINES IN THE NORTHERN GREAT PLAINS. BECAUSE OVERBURDEN HANDLING IS THE MOST EXPENSIVE PART OF ANY RECLAMATION PLAN, ANY LAND-USE OPTION WHICH REDUCES THE AMOUNT OF SPECIAL HANDLING REQUIRED (SUCH AS

WILDLIFE MANAGEMENT) TENDS TO BE THE MOST ECONOMICAL.

PRIMARY FUNDING AMOUNT

FY77: \$50,000

TIME FRAME

OCTOBER, 1977 TO OCTOBER, 1979

LOCATION

MT / POWDER RIVER BASIN

ABSTRACT

OBJECTIVES: (1) A SPECTRUM OF MINE SOILS FROM THE NORTHERN
GREAT PLAINS COAL PROVINCE WITH VARYING CHEMICAL AND
PHYSICAL PROPERTIES WILL BE IDENTIFIED AND CHARACTERIZED.
(2) CRITERIA WILL BE DEVELOPED FOR EVALUATING THE POTENTIAL
OF MINE SOILS FOR SELECTED LAND USES. APPROACH: (1) SPECIAL
EMPHASIS WILL BE PLACED ON CHARACTERIZING SPECIAL PROPERTIES
OF MINE SOILS SUCH AS HIGH ROCK FRAGMENT CONTENT, WEATHER-
ABILITY OF ROCK FRAGMENTS, AND STRATIFICATIONS OF CONTRASTING
TEXTURE. METHODS WILL ALSO BE DEVELOPED AND PROPOSED FOR
MAPPING MINE SOILS AND FOR DESCRIBING MAPPING UNITS OF
SOILS ON MINED LAND. MINE SOIL VARIABILITY WILL ALSO BE
STUDIED. (2) CRITERIA FOR EVALUATING MINE SOIL POTENTIAL
WILL BE SELECTED ON THE BASIS OF EXTENSIVE REVIEW OF
EXISTING LITERATURE AND ADDITIONAL FIELD RESEARCH.
PROGRESS: INITIAL FIELD WORK, SITE SELECTION, AND LITERATURE
REVIEW WERE BEGUN IN THE FALL OF 1977.

ABSTRACT

THE ERODIBILITY OF SPOILS AND TOPSOIL IS AN IMPORTANT
PARAMETER IN PLANNING RECLAMATION STRATEGIES, SURFACE
DRAINAGE DESIGN, AND AMELIORATING ENVIRONMENTAL
IMPACTS. THE STUDY OBJECTIVES ARE: 1) TO MEASURE THE
THE RELATIVE ERODIBILITY OF A WIDE RANGE OF TOPSOILS
AND SPOIL MATERIALS USING A RAINDROP SIMULATOR; 2)
TO RELATE THE MEASURED ERODIBILITY TO PHYSICAL AND CHEMICAL
CHARACTERISTICS OF THESE MATERIALS; 3) TO COMPARE ESTIM-
ATED EROSION CAUSED BY RAINDROP IMPACT TO EROSION
MEASURED ON FIELD PLOTS (ARS, ETC.); 4) TO DEVELOP
GUIDELINES TO ESTIMATE THE RELATIVE ERODIBILITY OF
SURFACE MINE MATERIALS.

LOCATION

WYOMING / SHERIDAN COUNTY

ABSTRACT

THE HIDDEN WATER CREEK AREA WAS MINED FROM 1944 TO 1955 AND WAS THEN ABANDONED. THE OPEN PITS FILLED WITH WATER AND POND-TYPE ECOSYSTEMS DEVELOPED. LIGHT PENETRATES TO GREATER DEPTHS WITHIN TWO CONTROL PONDS LOCATED OUTSIDE THE MINE AREA. THE LOWER LIGHT PENETRATION IN THE PONDS WITHIN THE MINED AREA PROBABLY IS DUE, IN PART, TO THE GREATER NUMBER OF PHYTOPLANKTON CELLS. ALSO, UNCONSOLIDATED SOIL MATERIAL WITHIN THE MINE AREA WAS OBSERVED TO SLOUGH OFF THE POND BANKS, WHICH COULD ADD TO THE CONCENTRATION OF SUSPENDED SEDIMENTS.

DISSOLVED OXYGEN CONCENTRATIONS WERE LOWER IN THE PONDS WITHIN THE MINED AREA. MOST OF THE MAJOR IONS (CALCIUM, MAGNESIUM, SULFATE, AND SODIUM) WERE PRESENT IN GREATER CONCENTRATIONS IN THE PONDS WITHIN THE MINED AREA. HIGHER CONCENTRATIONS OF BICARBONATE AND TOTAL HARDNESS WERE MEASURED IN THE WATER WITHIN THE MINED AREA. BIOLOGICAL COMMUNITIES WERE LESS DIVERSE AND CHEMICAL CONCENTRATIONS FLUCTUATED MORE IN THE MINED AREA THAN IN THE PONDS OUTSIDE THE MINED AREA.

ABSTRACT

THE PRIMARY OBJECTIVE OF THIS INVESTIGATION WILL BE TO STUDY MECHANISTIC AND KINETIC ASPECTS OF MICROBIAL SULFATE REDUCTION IN SOUTHEASTERN MONTANA GROUNDWATERS. THE POSSIBLE SOURCES OF ORGANIC MATERIAL FOR SULFATE REDUCING BACTERIA WILL BE EXAMINED AS WILL THE CONTENTION THAT THESE ORGANISMS ARE ACTIVE IN AN ATTACHED STATE, PRIMARILY IN SUBSURFACE MICROZONES.

A SECONDARY OBJECTIVE, WHICH WILL LARGELY DEPEND ON THE OUTCOME OF THE INITIAL ASPECTS OF THIS STUDY, INVOLVES APPLICATION OF THIS WORK TO COAL MINING RELATED WATER POLLUTION PROBLEMS. THE RATES AT WHICH SULFATE REDUCING BACTERIA CAN REMOVE SULFATES FROM GROUNDWATERS WOULD BE DETERMINED AND THEN BY MANIPULATION OF ENVIRONMENTAL PARAMETERS, ATTEMPTS WILL BE MADE TO MAXIMIZE THESE RATES. THIS PORTION OF THE STUDY MAY SUGGEST EFFECTIVE WAYS TO RE-ESTABLISH SULFATE REDUCING POPULATIONS IN BACKFILLED COAL OVERBURDEN AND METHODS TO INCREASE SULFATE REDUCTION RATES, HENCE HEAVY METAL PRECIPITATION IN SETTLING PONDS.

ABSTRACT

THE MAIN OBJECTIVE OF THIS STUDY WAS TO OUTLINE AN ANALYTICAL PROCEDURE THAT WOULD DETERMINE THE ENERGY USE ON IRRIGATED CROPLAND. THE PROCEDURE USED WAS APPLIED CONSISTENTLY OVER THE 17 WESTERN STATES. FROM THIS DATA BASE, CHANGES IN THE ASSUMPTIONS REGARDING WATER SOURCES, IRRIGATION METHODS, ENERGY CONVERSION EFFICIENCY, AND FUEL SUBSTITUTIONS WERE ANALYZED. THIS STUDY WAS BASED ON THE 105 PRODUCING AREAS WHICH ARE THE BASIC REGIONAL UNIT FOR THE PROGRAMMING MODEL USED IN THE NATIONAL STUDY ON ENERGY AND U. S. AGRICULTURE AT THE CENTER FOR AGRICULTURAL AND RURAL DEVELOPMENT. CONVERTING STATE DATA TO PRODUCING AREA DATA WAS ACCOMPLISHED BY WEIGHTS REFLECTING THE PROPORTION OF THE 1969 IRRIGATED CROPLAND ACRES FOR THE 17 WESTERN STATES IN EACH OF THE IRRIGATED PRODUCING AREAS. THE STUDY YIELDED SOME ESTIMATES OF ENERGY USE IN IRRIGATION AND PROVIDED A MEANS TO EVALUATE POLICIES AFFECTING IRRIGATION FROM GROUND WATER, PUMPING DEPTH, AND IRRIGATION METHODS.

REPORTS AND PUBLICATIONS

ENERGY REQUIREMENTS OF IRRIGATED CROPS IN THE WESTERN UNITED STATES, MISCELLANEOUS REPORT, BY DAN DVOSKIN AND EARL O. MEADY, CENTER FOR AGRICULTURAL AND RURAL DEVELOPMENT, IOWA STATE UNIVERSITY, AMES, IA, NOVEMBER 1976. AVAILABLE FOR \$1.00 FROM ABOVE ADDRESS.

ABSTRACT

IN 1977, THE 45TH MONTANA LEGISLATURE PASSED HOUSE JOINT RESOLUTION 22 DIRECTING THE DEPARTMENT OF NATURAL RESOURCES AND CONSERVATION TO: 1) DISCUSS WITH REPRESENTATIVES OF THE STATE OF WYOMING, THE CROW TRIBE, AND THE NORTHERN CHEYENNE TRIBE THE POSSIBILITY OF JOINTLY STUDYING WATER SUPPLY PROJECTS IN THE TONGUE AND POWDER RIVER BASINS; 2) INVESTIGATE WATER QUALITY AND SALINITY IN THE TWO BASINS; AND 3) INVESTIGATE WATER MARKETING POTENTIAL IN THE TWO BASINS. THE STUDY INCLUDED AN EXAMINATION OF WATER REQUIREMENTS FOR LIKELY INDUSTRIAL USE (LIQUEFACTION, HIGH BTU GASIFICATION, GENERATION, COAL SLURRY, AND COAL MINING) IN THE TWO RIVER BASINS. OUT OF FORTY THREE INDUSTRIAL COMPANIES CONTACTED, EIGHT COMPANIES INDICATED INTEREST IN THE POSSIBILITY OF PURCHASING TONGUE RIVER WATER FOR FUTURE COAL-RELATED INDUSTRIAL DEVELOPMENT.

ABSTRACT

THE OBJECTIVE OF THIS ASSESSMENT WAS TO ASSESS WATER SUPPLY AVAILABILITY FOR THE DEVELOPMENT OF EMERGING COAL TECHNOLOGIES IN THE UPPER MISSOURI RIVER BASIN AGAINST A BACKGROUND OF CONVENTIONAL WATER NEEDS. IMPLICIT WITHIN THIS OBJECTIVE WAS ASSESSMENT OF THE IMPLICATIONS OF COAL DEVELOPMENT WITH RESPECT TO THE ASSESSMENT AREA'S WATER AND RELATED LAND RESOURCES AND THE EVALUATION OF WATER-RELATED CONSTRAINTS TO COAL DEVELOPMENT INCLUDING POSSIBLE MEANS OF REMOVING SUCH CONSTRAINTS. THIS ASSESSMENT WAS CONDUCTED FOR TWO TIME FRAMES-SHORT-RANGE (PRESENT TO 1985) AND LONG-RANGE (1985 TO 2000). THE FOLLOWING SUBJECTS WERE CONSIDERED IN THE ASSESSMENT: (1) EVALUATION OF PROJECTED WATER SUPPLY AVAILABILITY AND WATER QUALITY EXCLUSIVE OF EMERGING ENERGY TECHNOLOGY DEVELOPMENT; (2) EVALUATION OF ENERGY TECHNOLOGY DATA AND RELATED INFORMATION PROVIDED BY THE DEPT. OF ENERGY; (3) SELECTION OF CANDIDATE AREAS FOR ENERGY TECHNOLOGY DEVELOPMENT; (4) IDENTIFICATION AND ASSESSMENT OF POTENTIAL FOR AND IMPACTS OF USING ANY UNCOMMITTED WATER IN CERTAIN CANDIDATE AREAS; (5) IDENTIFICATION AND ASSESSMENT OF ANY INDICATED POTENTIAL CHANGES IN CURRENTLY UTILIZED WATER; (6) IDENTIFICATION AND ASSESSMENT OF ALTERNATIVES TO (4) AND (5) THROUGH WATER MANAGEMENT, TECHNOLOGY, AND SITING OPTIONS; AND (7) COST ESTIMATES FOR WATER SUPPLY AND WASTE WATER DISPOSAL.

ABSTRACT

THE FUNDAMENTAL PURPOSE OF THE STUDY WAS TO INVESTIGATE THE POSSIBILITY OF PROVIDING MUNICIPALITIES AND RURAL AREAS IN WESTERN SOUTH DAKOTA AND MUNICIPALITIES, RURAL AREAS, AND ENERGY DEVELOPMENT INDUSTRIES IN NORTHEASTERN WITH A RELIABLE WATER SUPPLY BY CONSTRUCTING AN AQUEDUCT FROM OAME RESERVOIR TO NORTHEASTERN WYOMING. THE OBJECTIVES OF THE STUDY WERE TO DETERMINE THE: A) FEASIBILITY OF THE PROJECT B) WATER NEEDS OF THE AREA C) FINANCING PLAN AND D) LEGAL AND INSTITUTIONAL ARRANGEMENTS. THE STUDY WAS CONDUCTED UNDER THE DIRECTION OF A SOUTH DAKOTA-WYOMING STUDY MANAGEMENT TEAM. THIS TEAM SELECTED THE CONSULTANTS FOR COMPLETION OF THE STUDY AND ADVISED THE CONSULTANTS WITH REGARD TO THE PLAN OF STUDY AND REPORT PREPARATION.

REPORTS AND PUBLICATIONS

1. WEST RIVER AQUEDUCT-SUMMARY REPORT, 2. WEST RIVER AQUEDUCT-TECHNICAL REPORT. BOTH REPORTS WERE AUTHORIZED BY THE CONSULTANTS FOR THE MANAGEMENT TEAM. ALL AVAILABLE REPORTS FOR S. D. HAVE BEEN DISTRIBUTED. THE SOUTH DAKOTA STATE LIBRARY HAS A COPY AS DO THE LIBRARIES OF THE SEVEN STATE SUPPORTED COLLEGES & UNIVERSITIES. TIME FRAME

JULY, 1975 TO SEPTEMBER, 1977

ABSTRACT

OBJECTIVES: DEVELOP CRITERIA BY WHICH TO ASSESS THE IMPACT OF POLLUTANTS FROM POWER GENERATION ON THE SOLAR AND TERRESTRIAL RADIATIVE FLUXES, AND TO DETERMINE THEIR CAPABILITY FOR ALTERING AMOUNT AND DISTRIBUTION OF PRECIPITATION THROUGH CHANGES IN THE NUMBERS OF CLOUD AND ICE NUCLEI. APPROACH: MEASURE IN-SITU BY AIRCRAFT 1) NUMBER AND SIZE DISTRIBUTIONS OF PRIMARY (FLYASH) AND SECONDARY (GAS-TO-PARTICLE CONVERTED) AEROSOLS, 2) GASES THAT LEAD TO PARTICLE FORMATION, 3) INFRARED TERRESTRIAL RADIATION 4) ELECTRIC FIELDS AND CONDUCTIVITIES OF THE ATMOSPHERE, 5) AEROSOL LIGHT SCATTERING COEFFICIENTS. COLLECT ADDITIONAL AEROSOL AND RADIATIVE EFFECTS, VIZ. PARTICULATE SIZES SHAPES, AND ELEMENTAL COMPOSITIONS. INDEPENDENTLY DETERMINE THE CLOUD AND ICE NUCLEATING PORTION OF THE AEROSOL. CONDUCT SIMILAR MEASUREMENTS AND SAMPLE COLLECTIONS AT SELECTED SAMPLE LOCATIONS. MEASURE VISIBILITIES PHOTOMETRICALLY AND BY LIGHT SCATTERING COEFFICIENT. USE MEASURED AEROSOL SIZE DISTRIBUTIONS AS INPUT INTO RADIATIVE TRANSFER MODELS. PROGRESS: IN COAL FIRED POWERPLANT PLUMES, SECONDARY AEROSOLS FROM THE CONVERSION OF SO₂ TO SO₄ AT A RATE OF A FEW PER CENT PER HOUR AFFECT THE CONDENSATION MODE AT LESS THAN 0.05 MICROGRAMS PARTICLE RADIUS OF THE ATMOSPHERIC AEROSOL SIZE DISTRIBUTION. PRIMARY AEROSOLS (FLYASH ASSOCIATED WITH A NEGLIGIBLY SMALL AMOUNT OF PARTICULATE SULFUR ON ITS SURFACE) AFFECT THE OPTICALLY IMPORTANT ACQUISITION MODES AT SEVERAL MICRONS RADIUS. THE ACCUMULATION MODE AT AROUND 0.1 MICROGRAMS APPEARS PHYSICALLY INVARIANT IN SPACE AND TIME, BUT IS SUBJECT TO CHEMICAL VARIATIONS DUE TO INTERACTIONS WITH PLUME GASES AND AEROSOLS. CONTRARY TO SULFATES, SUBMICRON NITRATE PARTICULATES HAVE NOT BEEN FOUND IN ABUNDANCE IN EITHER PLUMES OR BACKGROUND AIR.

ABSTRACT

POTENTIAL ENVIRONMENTAL PROBLEMS FROM COAL DEVELOPMENT
IN THE NORTHERN GREAT PLAINS WERE EXAMINED IN THIS STUDY.
A REGIONAL SCALE AIR POLLUTION MODEL WAS USED TO ASSESS
THE IMPACT OF POLLUTANT EMISSIONS ON AIR QUALITY AT
LARGE DISTANCES. THIS MODEL IS BASED ON THE NUMERICAL
SOLUTION OF THE ATMOSPHERIC DIFFUSION EQUATION.
SULFUR DIOXIDE EMISSIONS INVENTORIES CONSTRUCTED FOR
1976 AND 1986 WERE USED WITH THIS MODEL TO CALCULATE
LONG RANGE TRANSPORT, DIFFUSION, AND DRY DEPOSITION OF
SO₂ AND SULFATES FOR THREE METEOROLOGICAL CONDITIONS:
A STRONG-WIND WINTER CASE, A STAGNATION SPRING CASE,
AND A MODERATE-WIND SUMMER CASE. CALCULATED SO₂
CONCENTRATIONS NEAR POINT SOURCES ARE HIGHEST FOR THE
STAGNATION SPRING CASE, INTERMEDIATE FOR THE STRONG-
WIND WINTER CASE, AND LOWEST FOR THE MODERATE-WIND SUMMER
CASE. LONG RANGE TRANSPORT OF SO₂, IN CONTRAST,
APPEARS TO BE SLIGHTLY GREATER IN THE WINTER AND SUMMER
CASES THAN IN THE SPRING. FOR AN SO₂/SULFATE CONVERSION
RATE OF 0.3% H⁻¹, THE PREDICTED SULFATE CONCENTRATIONS
ARE NOT SIGNIFICANTLY ABOVE THE BACKGROUND LEVEL. A
SIMULATION USING A RATE OF 3% H⁻¹, HOWEVER, YIELDS A
MAXIMUM 3-H AVERAGE SULFATE CONCENTRATION OF 20 G M⁻³.

ABSTRACT

OBJECTIVE: ANALYZE THE EFFECTS OF COAL-BASED GROWTH IN WYOMING'S POWDER BASIN ON REGIONAL ECONOMIC COSTS AND BENEFITS, DISTRIBUTION OF COSTS AND BENEFITS BETWEEN PUBLIC AND PRIVATE SECTORS. PREDEVELOPMENT RESIDENTS. DETERMINE INSTITUTIONAL PROBLEMS ASSOCIATED WITH GROWTH OF ENERGY AND STRATEGIES THAT WILL HELP SOLVE SUCH PROBLEMS.

APPROACH: AN ANALYTICAL TECHNIQUE APPROPRIATE FOR ASSESSING THE CHANGES IN ECONOMIC WELL-BEING CAUSED BY CHANGES IN ECONOMIC ACTIVITY WILL BE UTILIZED.

OBJECTIVE 1 WILL BE ACCOMPLISHED BY EXAMINING THE AREA AND PEOPLE AFFECTED AT THREE TIME PERIODS--PREDEVELOPMENT; START-UP PHASE OF DEVELOPMENT, AND AFTER DEVELOPMENT IS ESTABLISHED. OBJECTIVE 2 WILL BE ACCOMPLISHED BY EXAMINING HOW VARIOUS TAX AND INSTITUTIONAL STRATEGIES AFFECT RESIDENTS DURING THE SECOND AND THIRD PHASES. PROGRESS: ONE STUDY IS UNDERWAY AND ANOTHER IS BEING STARTED. THE FIRST STUDY IS TO SEE HOW ENERGY DEVELOPMENT IN NORTHEASTERN WYOMING IS AFFECTING THE AGRICULTURAL LABOR MARKET AND THE ORGANIZATION AND OPERATION OF RANCHES. THE SECOND STUDY WILL BE LOOKING AT HOW ENERGY DEVELOPMENT MIGHT AFFECT SECONDARY AND TERTIARY ECONOMIC ACTIVITY IN A RURAL AGRICULTURALLY ORIENTED COMMUNITY.

ABSTRACT

CHARGED WITH THE RESPONSIBILITY OF DEVELOPING A GROWTH

MANAGEMENT PLAN FOR AN ENERGY DEVELOPMENT IMPACT AREA. THE MERCER COUNTY EDB SELECTED A CONSULTANT FIRM TO COMPLETE THREE BASIC ITEMS ON CITIZEN PARTICIPATION WHICH WERE DESIGNED TO DEVELOP AN UNDERSTANDING OF PUBLIC GOALS, POLICIES AND OBJECTIVES FOR GROWTH MANAGEMENT. THE THREE PROJECTS ACCOMPLISHED WERE (1) A CONTENT ANALYSIS OF PREVIOUSLY PUBLISHED DOCUMENTS ON MERCER COUNTY; (2) PUBLIC MEETINGS IN WHICH PLANNING TOPICS WERE REVIEWED IN PREPARED WORKBOOKS; AND (3) A RANDOM HOUSEHOLD SURVEY OF RESIDENTS TO OBTAIN COMMENTS ON SEVERAL BASIC QUESTIONS. THE FINDINGS COVER PUBLIC DECISION MAKING, PUBLIC PLANNING, PUBLIC FINANCING, PUBLIC ADMINISTRATION, AGRICULTURE, CULTURAL AND SOCIAL QUESTIONS, ECONOMICS, EDUCATION, ENERGY CONSERVATION, HEALTH AND PUBLIC SAFETY, NATURAL RESOURCES, AND RECREATION.

ABSTRACT

ENERGY CONSERVATION GUIDEBOOK FULFILLS PART OF THE

BEST DOCUMENT AVAILABLE

EDB'S CONTRACTUAL ARRANGEMENT WITH THE U. S. DOE FOR THE "CONDUCT OF ENERGY CONSERVATION" ACTIVITIES. THE GUIDEBOOK TAKES A COMPREHENSIVE LOOK AT HOW TO REDUCE ENERGY CONSUMPTION IN BUILDINGS IN MERCER COUNTY. THE BOOK DESCRIBES THE CLIMATE OF THE COUNTY AND PRESENTS AN OVERVIEW OF ENERGY CONSERVING PRINCIPLES AND TECHNIQUES. THE SECTION ON MERCER COUNTY'S CLIMATE CONTAINS DATA ON TEMPERATURE, HEATING AND COOLING DEGREE DAYS, PRECIPITATION, SUNSHINE AND CLOUDINESS, HUMIDITY AND WIND. THE PORTION ON ENERGY CONSERVATION DETAILS SITE SELECTION, BUILDING SHAPE, ROOM ORIENTATION, OPENINGS, WINDOWS, LANDSCAPING, BUILDING MATERIALS, SOLAR HEATING, LIGHT AND COLOR, AND COMMUNITY PLANNING AREAS OF CONCERN.

ABSTRACT

GROWTH MANAGEMENT CHOICES IS A PART OF THE MERCER COUNTY ENERGY DEVELOPMENT BOARD'S GROWTH MANAGEMENT PLAN WHICH REVIEWS POPULATION DISTRIBUTION, LAND USE, HOUSING, PUBLIC FACILITIES AND SERVICES, AND PUBLIC FINANCING. THE REVIEWED TOPICS WERE COMPARED IN THREE BASIC GROWTH MANAGEMENT ALTERNATIVES: RANDOM SPRAWL, EXPANDING CITIES, AND NEW TOWNS. EACH OF THE THREE ALTERNATIVES DISCUSSES 1) DEVELOPMENT PATTERNS (LOCATION, USES, DENSITY); 2) REVENUES (COAL SEVERANCE, COAL CONVERSION AND PROPERTY TAXES); 3) COSTS (GENERAL GOVERNMENT, SEWER AND WATER, POLICE AND FIRE PROTECTION, ROADS AND SCHOOL BUSSES); 4) ENERGY CONSERVATION; AND 5) GOVERNMENT ORGANIZATION/ GROWTH MANAGEMENT PROCEDURES.

ABSTRACT

THE EDB HAS DEVELOPED AN ENERGY CONSERVATION PROGRAM AS A PART OF ITS GROWTH MANAGEMENT PLAN. ENERGY MANAGEMENT AND CONSERVATION ARE VITAL ELEMENTS IN COMMUNITY PLANNING. THE ELEMENTS OF THE PROGRAM - CONSERVATION IDEAS, IMPLEMENTATION MECHANISONS, AND THE MONITORING PROCESS ARE COORDINATED WITH THE GROWTH MANAGEMENT PLANNING EFFORT. THE REPORT ON THE ECP DISCUSSES 5 TASKS: (1) DEVELOPING AN ENERGY CONSUMPTION PROFILE; (2) DEFINING ENERGY CONSERVATION OBJECTIVES; (3) SELECTING ENERGY CONSERVATION IDEAS; (4) IMPLEMENTING SELECTED IDEAS; AND (5) EVALUATION PROGRESS ON THE ECP IS LISTED AS POLICIES, REGULATIONS, INCENTIVES, EDUCATION PROGRAM,

ABSTRACT

TO EFFECTIVELY PLAN FOR CHANGES AND THE IMPACTS OF GROWTH, THE MERCER COUNTY EDB IS DEVELOPING A GROWTH MANAGEMENT

PLAN. TO ENSURE THAT THE PLAN REFLECTS CHANGING NEEDS AND CIRCUMSTANCES, THE EDB HAS DEVELOPED A MONITORING PROCESS. THE MONITORING PROGRAM WILL ENSURE THAT DATA ON SOCIAL AND ECONOMIC CONDITIONS, ENERGY USAGE, AND ENVIRONMENTAL IMPACTS IS PROVIDED AS NEEDED TO A VARIETY OF PARTIES INTERESTED IN AND AFFECTED BY ENERGY AND COMMUNITY DEVELOPMENT. AREAS OF CONCERN IN THE MONITORING PROGRAM ARE THE ENERGY INDUSTRY WORK FORCE; SOCIAL, ECONOMIC AND FISCAL ITEMS (EMPLOYMENT, DEMOGRAPHIC, INCOME, HOUSING, BUSINESS, PUBLIC SERVICES, PUBLIC COSTS AND REVENUES, TRANSPORTATION, LAND USE, MEDICAL, SOCIAL); ENERGY CONSUMPTION AND ENVIRONMENT (RECLAMATION, WATER QUALITY AND QUANTITY, AIR QUALITY, PUBLIC HEALTH AND WILDLIFE).

ABSTRACT

TO ASSIST THE COMMUNITIES OF MERCER COUNTY, ND IN PLANNING FOR PROJECTED GROWTH FROM THE DEVELOPMENT OF

ENERGY PRODUCTION FACILITIES THE EDB IS PREPARING A GROWTH MANAGEMENT PLAN. ALSO TYPICAL OF THE RAPID

GROWTH SITUATION IS THE DEPARTURE OF WORKERS FOLLOWING CONSTRUCTION. IN ANTICIPATION OF THE SPECIFIC PROBLEMS GENERATED BY THE SLODGE LOSS OF POPULATION WHEN CONSTRUCTION ENDS THE EDB HAS UNDERTAKEN AN ECONOMIC DIVERSIFICATION PROGRAM (EDP). THE GOAL OF THE EDP IS TO ACHIEVE MAXIMUM, ORDERLY, BALANCED ECONOMIC DEVELOPMENT BY UTILIZING THE NATURAL, MATERIAL AND HUMAN RESOURCES OF MERCER COUNTY. THE PUBLISHED REPORT ON THE EDP DISCUSSES DEVELOPMENT OF THE PROGRAM, PROGRESS ON THE SCREENING OF POTENTIAL INDUSTRIES, AND FEASIBILITY STUDIES ON FLY ASH BRICK, GREENHOUSE PRODUCTION AND AQUACULTURE.

ABSTRACT

THIS STUDY PROVIDES A SOCIOECONOMIC PROFILE OF SELECTED COAL AREAS OF THE NORTHERN GREAT PLAINS. POTENTIAL PROBLEMS THAT MAY ARISE FROM COAL DEVELOPMENT ARE IDENTIFIED AND MEASURED. THE STUDY COVERS SUCH ITEMS AS HISTORICAL AND RECENT TRENDS IN POPULATION, INCOME, AND EMPLOYMENT FOR

BEST DOCUMENT AVAILABLE

THE REGION AS A WHOLE, AND FOR SELECTED AREAS AND TOWNS WITHIN THE REGION. DATA FOR THE REGION ARE COMPARED WITH

17

DATA FOR THE ENTIRE UNITED STATES AND ALL U. S. NONMETRO COUNTIES. THE STUDY MAKES WIDE USE OF DATA FROM THE CENSUS OF POPULATION. THE FEDERAL STATE COOPERATIVE SERIES OF COUNTY POPULATION ESTIMATES ARE USED TO MEASURE 1970-74 POPULATION AND COMPONENTS OF CHANGE.

ABSTRACT

ALTHOUGH MOST AREAS IMPACTED BY ENERGY DEVELOPMENT ARE THE SUBJECT OF ONE OR MORE ENVIRONMENTAL IMPACT STATEMENTS, FEW EIS'S ADDRESS CUMMULATIVE RATHER THAN INCREMENTAL DEVELOPMENT AND A COMPREHENSIVE ANALYSIS OF FUTURE LOCAL GOVERNMENTAL IMPACTS IS GENERALLY ABSENT. SUCH INFORMATION IS ESSENTIAL IF ADVERSE SOCIOECONOMIC IMPACTS ARE TO BE MITIGATED OR AVOIDED BY RESPONSIBLE PUBLIC OFFICIALS. THE OBJECTIVE OF THE PROJECT WAS TO PREPARE IMPACT ANALYSES FOR LOCAL GOVERNMENTS AFFECTED BY ENERGY DEVELOPMENT WHICH WOULD EXAMINE CUMMULATIVE IMPACTS OF LOCAL GOVERNMENT OPERATIONS AND SERVICES FOR THE PERIOD 1978 TO 1985. MAJOR POINTS OF FOCUS IN THE ANALYSIS WERE DESCRIPTIONS OF CURRENT EXPENSES, OPERATING BUDGETS AND AVAILABLE REVENUES. ANNUAL PROJECTIONS OF EXPENSES AND REVENUES AT THE DEPARTMENTAL LEVEL WERE AGGREGATED FOR ANALYSIS OF EACH LOCAL GOVERNMENT'S OVERALL FISCAL NEEDS. THE ANALYSIS HIGHLIGHTS FUTURE FISCAL AND MANAGEMENT PROBLEMS THAT MUST BE ADDRESSED FOR IMPACT MITIGATION AND AVOIDANCE STRATEGIES AT THE LOCAL LEVEL OR FOR COMPLEMENTARY STATE, FEDERAL AND INDUSTRY EFFORTS. THE PROJECT COVERED COUNTY, MUNICIPAL AND SCHOOL DISTRICT GOVERNMENTS IN THE FOLLOWING ENERGY IMPACT-AREAS OF WYOMING: CAMPBELL, CARBON, SWEETWATER, LINCOLN, JOHNSON, CROOK, UINTA AND WESTON COUNTIES. ABSTRACT

PROBLEM: NEGATIVE SOCIOECONOMIC IMPACTS OCCUR IN ENERGY RESOURCE DEVELOPMENT FROM EXTRACTION TO CONSUMPTION. THESE IMPACTS MAY CAUSE PRODUCTIVITY DECREASES OR LITIGATION, FOR EXAMPLE, WHICH MAY PRECIPITATE AN ATTEMPT AT A LEGISLATIVE REMEDY (TAXES OR REGULATIONS) WHICH MAY OR MAY NOT PRODUCE THE DESIRED RESULTS UNLESS ADEQUATE SOCIO-ECONOMIC IMPACT ASSESSMENT IS INCLUDED IN POLICY AND DECISION MAKING.

OBJECTIVES: (1) IDENTIFY THE SORTS OF ENERGY DEVELOPMENT (OR MAJOR SHIFTS OR SUBSTITUTIONS IN ENERGY SUPPLY IN THE STATES); (2) IDENTIFY BOTH PERCEPTIONS OF ANTICIPATED SOCIOECONOMIC IMPACTS AND STATE MITIGATION MECHANISMS FOR DEALING WITH NEGATIVE IMPACTS; (3) ATTEMPT GENERALIZATIONS ON JURISDICTIONAL CONFLICT AND MISMATCH, COMPETITION FOR SCARCE RESOURCES, SHIFTS IN COMPARATIVE ADVANTAGE, AND BOOM TOWN IMPACTS; AND (4) STATE UNRESOLVED ISSUES. ALL WITH AN EYE TO FACILITATING BETTER INFORMED POLICY AND DECISION MAKING.

APPROACH: LITERATURE SEARCH AND PERSONAL INTERVIEWS

BEST DOCUMENT AVAILABLE

WITH STATE AND ENERGY COMPANY OFFICIALS WHO LATER REVIEWED AND COMMENTED ON DRAFT, AND PROVISION OF DETAILS

ABSTRACT

THE OBJECTIVE OF THIS STUDY IS TO PROVIDE A NET ENERGY ANALYSIS OF SURFACE MINED COAL FROM THE NORTHERN GREAT PLAINS. FOUR SCHEMES OF COAL DEVELOPMENT ARE EVALUATED TO DETERMINE THE ENERGY REQUIRED TO DELIVER COAL-DERIVED ENERGY IN A BULK FORM TO A LOAD CENTER 1000 MILES FROM THE MINE. THE COAL DEVELOPMENT SCHEMES ANALYZED ARE: (1) THE TRANSPORT OF RAW COAL BY UNIT TRAIN TO LOAD CENTER; (2) RAIL TRANSPORT OF COAL FOLLOWED BY LOAD CENTER ELECTRICAL POWER GENERATION; (3) MINE-MOUTH ELECTRICAL POWER GENERATION WITH HIGH VOLTAGE TRANSMISSION TO LOAD CENTER; AND (4) GASIFICATION OF COAL AT THE MINE WITH PIPELINE TRANSMISSION OF GAS TO LOAD CENTER. SEVERAL SYSTEM MODELS ARE ALSO PRESENTED TO ENHANCE UNDERSTANDING AND OVERVIEW OF THE INTERDEPENDENCE OF THE COAL RESOURCES, THE ENVIRONMENT, AND THE ECONOMY OF THE NORTHERN GREAT PLAINS. THE POTENTIAL IMPACT OF SURFACE MINING IS ADDRESSED AS WELL AS THE BENEFITS TO BE OBTAINED FROM AN AFFIRMATIVE RECLAMATION PROGRAM.

ABSTRACT

THE PURPOSE OF THIS PROJECT IS TO DEMONSTRATE THE FEASIBILITY OF FIRING A POWDERED COAL IN OIL SLURRY IN A UTILITY BOILER ORIGINALLY DESIGNED TO FIRE NATURAL GAS. THE GOAL IS TO PROVIDE A LOWER COST FUEL TO BRIDGE THE GAP UNTIL NUCLEAR AND OTHER ENERGY SOURCES ARE MORE WIDELY AVAILABLE. THIS WILL BE ACCOMPLISHED BY MIXING WYOMING COAL WITH OIL, AND FIRING THE SLURRY IN A NATURAL GAS BOILER THAT HAS BEEN MODIFIED AT A FRACTION OF THE COST OF A NEW COAL FIRED BOILER. THE WORK, STARTED OFFICIALLY IN OCTOBER, 1976, WILL BE ACCOMPLISHED THROUGH A COST SHARING CONTRACT WITH THE U. S. DEPARTMENT OF ENERGY, AND IS SCHEDULED FOR COMPLETION IN EARLY 1980. A BABCOCK AND WILCOX, 69 MW BOILER, DESIGNATED LEON CREEK UNIT 3, WILL BE MODIFIED FOR THIS PROJECT. THE BOILER, ORIGINALLY DESIGNED TO FIRE NATURAL GAS, IS NOT EQUIPPED WITH A PRECIPITATOR OR SOOT BLOWING EQUIPMENT. THESE ADDITIONS, PLUS EXTENDING THE STACK AND REPLACING THE BURNERS, COMPRISE THE MAJOR AREAS OF MODIFICATION. A FUEL BLENDING FACILITY, INCLUDING A COAL CRUSHER AND AN OIL HOMOGENIZER, WILL BE CONSTRUCTED AT CPS'S J. T. DEELY SITE AS THIS IS THE CLOSEST LOCATION OF AN EXISTING COAL STORAGE AND COAL HANDLING FACILITY. PART OF THIS PROJECT HAS BEEN SUBCONTRACTED.

ABSTRACT

THE MONTANA POWER COMPANY IS WORKING WITH EPRI (ELECTRIC POWER RESEARCH INSTITUTE) AND MERDI (MONTANA ENERGY AND MHD RESEARCH AND DEVELOPMENT INSTITUTE) ON THE EFFECTS OF THE ELECTRIC UTILITY SYSTEM UPON THE MHD INVERTER AND THE EFFECT OF THE MHD OUTPUT ON THE ELECTRICAL SYSTEM. THESE EFFORTS ARE BEING SPONSORED BY EPRI. AVCO IS THE CONTRACTOR AND MONTANA POWER COMPANY'S WORK IS BEING COORDINATED BY MERDI. (THE INVERTER IS A DEVICE THAT CHANGES THE DIRECT CURRENT PRODUCED BY THE MHD CHANNEL INTO 60 CYCLE ALTERNATING CURRENT TO MATCH THE ELECTRIC UTILITY COMPANY SYSTEM.)

ABSTRACT

THIS STUDY WAS CONDUCTED TO DETERMINE IF THE MILES CITY-NEW UNDERWOOD 230-KV LINE WOULD MEET TRANSMISSION REQUIREMENTS IN THE EASTERN MONTANA, WESTERN NORTH DAKOTA, AND WESTERN SOUTH DAKOTA AREAS. THE STUDY PERIOD CHOSEN FOR THE TECHNICAL STUDIES WAS THE 1982 PERIOD BASED ON THE ASSUMPTION THAT THIS WOULD BE THE EARLIEST POSSIBLE INSERVICE DATE FOR THE FACILITY AS WELL AS A CRITICAL POINT FOR LOADING ON THE EXISTING SYSTEM. THE LINE WOULD BE PART OF A TRANSMISSION SYSTEM WHICH DELIVERS ELECTRIC POWER AND ENERGY FROM EXISTING POWER-PLANTS IN THE MONTANA-NORTH DAKOTA AREA. THERE ARE NO THERMAL GENERATING STATIONS OR MAJOR ENERGY USING FACILITIES ASSOCIATED WITH THIS TRANSMISSION PROJECT.

STUDY AFFILIATION

THIS PROJECT IS RELATED TO MILES CITY-NEW UNDERWOOD 230-KV ELECTRICAL TRANSMISSION LINE - MT, ND, SD, (EIS), ENERGY RESEARCH INFORMATION SYSTEM PROJECTS REPORT, VOL. 4, NO. 1, NO. 0000.

ABSTRACT

AN ANALYSIS OF THE INTERACTIONS BETWEEN COAL DEVELOPMENT

BEST DOCUMENT AVAILABLE

MENT AND TRANSPORTATION ALTERNATIVES IN COLORADO WAS PREPARED BY JR CORPORATION UNDER A CONTRACT TO THE COLORADO

ENERGY RESEARCH INSTITUTE. THE PURPOSE OF THE STUDY WAS TO DETERMINE THE RELATIONSHIPS BETWEEN POTENTIAL COAL SUPPLY, COAL DEMAND, AND COAL TRANSPORTATION MODES IN COLORADO THROUGH THE YEAR 2000. THIS RESEARCH EFFORT WAS UNDERTAKEN IN ORDER TO PROVIDE STATE POLICY MAKERS WITH CURRENT AND FUTURE COAL DEVELOPMENT AND TRANSPORTATION ALTERNATIVES IN THE FORM OF POLICY OPTIONS. THE NEED FOR THIS STUDY WAS IDENTIFIED INITIALLY BY THE STATE OF COLORADO'S LEGISLATIVE COUNCIL. THE LEGISLATIVE COUNCIL RECOGNIZED THAT RECENT NATIONAL EMPHASIS OF ENERGY CONVERSION AWAY FROM LESS PLENTIFUL FOSSIL FUELS COULD HAVE A SIGNIFICANT IMPACT ON WESTERN COAL PRODUCTION. THE LEGISLATIVE COUNCIL DETERMINED THAT ADDITIONAL RESEARCH WAS NECESSARY TO ASSESS POSSIBLE DETRIMENTAL ECONOMIC, SOCIAL, ENVIRONMENTAL, AND INSTITUTIONAL IMPACTS ON THE STATE OF COLORADO RESULTING FROM THIS INCREASED COAL PRODUCTION.

2) FROM THIS UNDERSTANDING, IDENTIFY NEW INDUSTRIES OR ECONOMIC ACTIVITIES FOR WHICH FAVORABLE

POTENTIAL BENEFITS EXIST FROM A LOCATION IN ONE OR MORE OF THE OLD WEST STATES.

ABSTRACT

RECENT RAPID INCREASES IN COAL EXTRACTION, CONVERSION AND TRANSPORT IN THE OLD WEST REGION AND PROSPECTIVE FUTURE INCREASES HAVE CREATED A SIGNIFICANT NEW MARKET FOR GOODS AND SERVICES NEEDED IN BOTH THE CONSTRUCTION AND OPERATING PHASES OF THOSE INDUSTRIES. THIS MARKET REPRESENTS A SIGNIFICANT OPPORTUNITY FOR ECONOMIC DIVERSIFICATION WITHIN THE OLD WEST REGION. THE GOALS OF THIS STUDY ARE TO: 1) GAIN A THOROUGH UNDERSTANDING OF BOTH THE COAL INDUSTRY AND THE INDUSTRIES THAT SUPPLY GOODS AND SERVICES TO IT; AND

ABSTRACT

TONSTEIN AND OTHER PARTINGS FROM WESTERN COAL BEDS WILL
BE COLLECTED AND CHARACTERIZED MINERALOGICALLY AND TEXTURALLY
BY CHEMICAL ANALYSES, X-RAY DIFFRACTION, AND THE SCANNING
ELECTRON MICROSCOPE. RADIOMETRIC AGES WILL BE MEASURED ON
THE ZIRCON CONTENT OF SPECIFIC TONSTEIN SAMPLES BY MEANS OF
THE FISSION TRACK METHOD. CORRELATION OF CERTAIN
BEDS WILL BE MADE, WHERE APPLICABLE, BY MEANS OF THEIR
CONTAINED TONSTEIN PARTINGS. THE MINERAL MATTER CONTENT OF
WESTERN COALS WILL BE STUDIED BY LOW TEMPERATURE ASHING
(IF THE USE OF AN ASHER CAN BE OBTAINED OR IF FUNDS BECOME
AVAILABLE FOR PURCHASE). THIS LOW TEMPERATURE ASH WILL
BE CHARACTERIZED MINERALOGICALLY BY X-RAY DIFFRACTION AND
CHEMICAL ANALYSIS, AND AN ATTEMPT WILL BE MADE TO ASSIGN
TRACE ELEMENTS TO SPECIFIC MINERAL PHASES.

ABSTRACT

THE GEOLOGICAL SURVEY OF WYOMING IS CONDUCTING A
RECONNAISSANCE STUDY TO IDENTIFY AND MAP GEOLOGICAL HAZARDS
IN WYOMING. INFORMATION DERIVED FROM THIS STUDY WILL
FORM A NUCLEUS FOR AN EXTENSIVE DATA BASE AND INVENTORY
OF THESE TYPES OF HAZARDS. SUBJECT TO FUTURE FUNDING,
THIS DATA BASE CAN BE EXPANDED. THE DATA BASE WILL
PROVIDE INFORMATION RELEVANT TO THE DESIGNATION OF LANDS
UNSUITABLE FOR SURFACE MINING DUE TO THE OCCURRENCE OF
GEOLOGICAL HAZARDS.

THE INITIAL PHASE OF THE STUDY INVOLVES THE EXAMINATION
OF AERIAL PHOTOGRAPHS AND ORTHOPHOTOQUADS FOR THE IDENTI-
FICATION OF AREAS CHARACTERIZED BY LANDSLIDES, CAVE-INS,
SUBSIDENCE, AND LARGE OR ENCROACHING SAND DUNES.
AREAS NEAR POTENTIALLY STRIPPABLE COAL THAT EXHIBIT
SEISMIC ACTIVITY OR RECENT FAULTING WILL ALSO BE
INVENTORIED.

IDENTIFIED GEOLOGICAL HAZARD AREAS TO ESTABLISH THEIR
EXTENT AND VALIDITY.

THE THIRD PHASE OF THE STUDY IS THE TRANSFER OF GATHERED
INFORMATION TO APPROPRIATE MAPS AND REPORTS WHICH WILL
BE AVAILABLE TO THE PUBLIC.

LOCATION

WESTERN FEDERAL COAL LEASES (20 LEASEHOLDERS IN
12 WESTERN STATES)

ABSTRACT

THE PURPOSE OF THIS STUDY WAS TO REVIEW THE ACCURACY
OF COAL ESTIMATES UNDER FEDERAL LEASE AND INFORMATION
ON THE LEASEHOLDERS' PAST PRODUCTION ON FEDERAL LEASES
AND THEIR CURRENT PRODUCTION PLANS UNTIL THE YEAR 1985.
THE RESERVE ESTIMATES AND PRODUCTION PROJECTIONS OF
BOTH INTERIOR AND THE LEASEHOLDERS FOR THE TOP 20
FEDERAL COAL LEASEHOLDERS WERE REVIEWED. FOR THE 219
LEASES REVIEWED, GAO FOUND THAT USGS FAILED TO
ROUTINELY OBTAIN LEASEHOLDER RESERVE ESTIMATES AND TO
FOLLOW ESTABLISHED PROCEDURES FOR ESTIMATING RESERVES.
WITH THE RESULT THAT USGS AND LEASEHOLDER ESTIMATES
OF RECOVERABLE COAL DIFFERED BY 2.3 BILLION TONS.
DURING THE COURSE OF THE STUDY, THE GAO ALSO REVIEWED
LEGISLATION, REGULATIONS, POLICIES, PROCEDURES, AND
PRACTICES PERTAINING TO LEASING FEDERAL COAL ON PUBLIC
LANDS.

REPORTS AND PUBLICATIONS

INACCURATE ESTIMATES OF WESTERN COAL RESERVES SHOULD BE
CORRECTED (COMPTROLLER GENERAL, REPORT TO THE CONGRESS
OF THE UNITED STATES, U. S. GENERAL ACCOUNTING OFFICE,
JULY 11, 1978, EMD-78-32).

THIS STUDY WAS REQUESTED BY THE CHAIRMAN, SENATE COMMITTEE
ON ENERGY AND NATURAL RESOURCES, U. S. CONGRESS. THIS
DOCUMENT MAY BE OBTAINED FROM THE U. S. GENERAL ACCOUNTING
OFFICE, DISTRIBUTION SECTION, ROOM 1518, 441 G STREET, NW,

TIME FRAME

DECEMBER, 1978 TO SEPTEMBER, 1979

LOCATION

WY / CARBON COUNTY

ABSTRACT

THE STUDY DEALS WITH THE IDENTIFICATION, MAPPING, AND CHARACTERIZATION OF SUBSIDENCE AREAS IN AN UNDERGROUND

COAL MINING DISTRICT IN WYOMING. SEVERAL TOWNS IN WYOMING ARE LOCATED OVER OR VERY NEAR UNDERGROUND COAL MINES. AS

THE POPULATION OF THESE TOWNS INCREASES, IT BECOMES IMPERATIVE TO IDENTIFY AND MAP AREAS AT POTENTIAL SUBSIDENCE. EARLY IDENTIFICATION OF SUCH AREAS COULD PREVENT EXTENSIVE PROPERTY DAMAGE. IT IS NECESSARY TO RELATE DEPTH OF COAL, THICKNESS OF MINED OUT BEDS, MINING METHODS, THE NATURE OF OVERBURDEN, STRUCTURAL GEOLOGY, AND HYDROLOGY TO SUBSIDENCE. IT IS HOPED THAT BY RELATING THESE PARAMETERS TO SUBSIDENCE, GUIDELINES CAN BE WORKED OUT TO IDENTIFY POSSIBLE AREAS OF SUBSIDENCE. THE STUDY IS CONCERNED WITH SUBSIDENCE IN THE HANNA COAL FIELD WITH THE ANTICIPATION THAT THE RESULTS COULD BE APPLIED TO OTHER AREAS IN WYOMING WHERE SUBSIDENCE HAS OCCURRED OR IS LIKELY TO OCCUR.

WYOMING GEOLOGICAL SURVEY

PRIMARY FUNDING AMOUNT

FY78 - \$7,500; FY79 - \$7,500; TOTAL: \$15,000

TIME FRAME

JUNE, 1977 TO JUNE, 1980

LOCATION

WY / LINCOLN COUNTY/ STEWART PEAK QUADRANGLE (T.35-36 N.,
R.118-119 W.)

ABSTRACT

THERE ARE THREE OBJECTIVES OF THIS PROJECT. THE FIRST
OBJECTIVE IS TO DETERMINE GEOLOGIC STRUCTURE OF THE
NORTHERN SALT RIVER RANGE (STEWART PEAK AREA). THRUST
FAULTING IS SPATIALLY CONDENSED IN THIS PART OF THE
WYOMING THRUST BELT, RESULTING IN VERY COMPLICATED
STRUCTURE. IN ADDITION, NORMAL FAULTING HAS COMPLICATED
THRUST SHEET RELATIONSHIPS.
THE SECOND OBJECTIVE INVOLVES DETAILED STRATIGRAPHIC
STUDIES OF THE PALEOZOIC SUCCESSION. IN PARTICULAR, THE
LOWER PALEOZOIC STRATA HAVE NOT PREVIOUSLY BEEN STUDIED.
THESE STRATA ARE INTRICATELY FAULTED AND FOLDED, AND
DETAILED STRATIGRAPHIC WORK WILL BE REQUIRED TO UNRAVEL
THE STRUCTURAL RELATIONSHIPS.
THE THIRD OBJECTIVE IS TO DETERMINE RESOURCE POTENTIAL
OF THE AREA, ESP. WITH REGARD TO PHOSPHATE ROCK AND
PETROLEUM. PHOSPHATE ROCK OCCURS IN THE PERMIAN PHOSPHORIA
FORMATION WHICH CROPS OUT IN LIMITED AREAS IN THE
STEWART PEAK QUADRANGLE; DETAILED SURFACE MAPPING WILL
DETERMINE THE EXTENT AND AMOUNT OF PHOSPHATE RESOURCE IN
THE AREA. THE NORTHERN SALT RIVER RANGE IS ALSO FAVORABLY
SITUATED WITH RESPECT TO POTENTIAL ACCUMULATIONS OF OIL
AND/OR GAS; SUBSURFACE STRUCTURAL ANALYSIS WILL HELP TO
DETERMINE THE POTENTIAL OF THIS RESOURCE.

ABSTRACT

OBJECTIVE: ESTABLISH THE FUEL REQUIREMENTS FOR ON-FARM
USAGE IN PRODUCTION AGRICULTURE IN NEBRASKA. EVALUATE
MODIFIED ON-FARM PRODUCTION SYSTEMS RELATIVE TO ENERGY
USAGE. EVALUATE NEW APPROACHES TO CONSERVATION ENERGY
PRACTICES.

APPROACH: FUEL REQUIREMENTS FOR ON-FARM PRODUCTION
AGRICULTURE WILL BE MONITORED FOR VARIOUS PRODUCTION
SYSTEMS IN THE STATE OF NEBRASKA. USING AN INSTRUMENTED
TRACTOR, POWER REQUIREMENTS FOR VARIOUS MACHINERY
SYSTEMS WILL BE DETERMINED IN NEBRASKA. AS EXISTING
EQUIPMENT IS MODIFIED TO REDUCE POWER REQUIREMENTS OR
AS NEW MACHINERY BECOMES AVAILABLE, THEIR POWER NEEDS
WILL BE EVALUATED. FROM THIS, EVALUATION OF CONSERVATION
SYSTEMS CAN BE MADE.

PROGRESS: FUEL USAGE FOR ON-FARM PRODUCTION HAS BEEN
MEASURED ON OVER 100 FARMS IN NEBRASKA. DATA FOR APPROX-
IMATELY NINE MONTHS USAGE HAVE BEEN COMPUTED. THE DATA
IS NOW BEING ANALYZED. THE ANALYSIS WILL ALLOW THE
EXAMINATION OF FUEL REQUIREMENTS FOR ALL COMMODITIES
UNDER INVESTIGATION RELATIVE TO THE FIELD OPERATIONS
ASSOCIATED WITH THE PARTICULAR COMMODITY. THIS MONITORING
OF FUEL USAGE WILL CONTINUE AT LEAST THROUGH THE SPRING
OF 1977 TO ACQUIRE DATA RELATIVE TO THE SPRING TILLAGE
OPERATIONS. INFORMATION IS PRESENTLY BEING ASSEMBLED
FOR PUBLICATION IN THE FORM OF INFORMATION BULLETINS
ON THE RELATIVE MERITS OF ENERGY CONSERVATION WITH
SUGGESTIONS AS TO ACHIEVING THESE SAVINGS.

ABSTRACT

OBJECTIVE: DEVELOP PRACTICAL REDUCED ENERGY TILLAGE
SYSTEMS FOR WYOMING CROPS.

APPROACH: TWO COMMERCIALY AVAILABLE NO-TILL SEEDERS
WILL BE USED TO RESEED MOUNTAIN MEADOWS. TEST PLOTS
WITH VARIOUS PLANT SPECIES AND CHEMICAL TREATMENTS
WILL BE ESTABLISHED. ENERGY REQUIREMENTS WILL BE
MEASURED AND COMPARED WITH ENERGY REQUIREMENTS FOR
CONVENTIONAL MEADOW RENOVATION. MINIMUM TILLAGE SMALL
GRAIN DRILLING TECHNIQUES UTILIZING COMMERCIALY AVAIL-
ABLE COMPONENTS WILL BE FIELD TESTED. CONTINUING
PLOTS WILL BE ESTABLISHED TO COMPARE DRYLAND CROPPING
PRACTICES FOR WHICH NO-TILL AND MINIMUM TILLAGE SEEDING
WOULD BE APPLICABLE. ENERGY REQUIREMENTS WILL BE
MEASURED IN EACH OF THE CROPPING PRACTICES. MINIMUM
TILLAGE SYSTEMS FOR CORN AND SUGAR BEETS UTILIZING
CONVENTIONAL PLANTING TECHNIQUES AND ADAPTED FOR FLOOD
IRRIGATION WILL BE COMPARED WITH CONVENTIONAL PLOW
BASED TILLAGE SYSTEMS.

ABSTRACT

A SPACE-HEATING ENERGY-CONSUMPTION MODEL FOR GREELEY, COLORADO FOR THE WINTER OF 1976-77 WAS WITHIN 98.9 PERCENT OF ACTUAL NATURAL GAS CONSUMPTION FOR THAT CITY. MODELING OF CHEYENNE, WYOMING, INCLUDING THE TESTING OF A NEW STATISTICAL SCHEME TO DEVELOP THE BUILDING CENSUS REQUIRED BY THE ENERGY CONSUMPTION MODEL, WAS PROGRESSED TO THE POINT WHERE RELIABLE NATURAL GAS CONSUMPTION ESTIMATES CAN BE MADE WITH THE MODEL FOR THAT COMMUNITY. A DETAILED STUDY OF TEMPERATURE AND SURFACE WIND PATTERNS IN AND NEAR THE CITY OF GREELEY, COLORADO REVEALED THAT, AT TIMES, AN URBAN HEAT ISLAND EFFECT IS PRESENT, IN SPITE OF THE RELATIVELY SMALL SIZE OF THAT TOWN. VARIOUS FEEDBACK MECHANISMS BETWEEN THE OCEANS AND THE ATMOSPHERE WERE EXAMINED. SEVERAL OF THESE MECHANISMS APPEAR TO BE THE CAUSE OF THE INTERANNUAL VARIABILITY OF THE ATMOSPHERE'S GENERAL CIRCULATION AND OF CLIMATIC CHANGES ON A TIME SCALE OF SEVERAL TENS OF YEARS.

ABSTRACT

THIS STUDY HAS FOUR PRINCIPAL OBJECTIVES: (1) TO FORECAST DEMAND AND SUPPLY FOR CRUDE OIL AND REFINED PRODUCTS IN THE NORTHERN TIER AND INLAND STATES BETWEEN 1980 AND 2000; (2) TO EVALUATE THE TRANSPORTATION ALTERNATIVES PROPOSED TO MEET PETROLEUM DEMAND IN THE NORTHERN TIER; (3) TO ASSIST THE DEPARTMENT OF THE INTERIOR IN PREPARING THE ENVIRONMENTAL IMPACT STATEMENT FOR THE NORTHERN TIER PROPOSAL; AND (4) TO PROVIDE AN ANALYTICAL BASIS UPON WHICH THE PRESIDENT MAY SELECT A CRUDE OIL TRANSPORTATION PROJECT DEEMED TO BE IN THE NATIONAL INTEREST FOR EXPEDITED TREATMENT IN THE FEDERAL PERMITTING PROCESS.

LOCATION

SD

ABSTRACT

OBJECTIVE: EVALUATE SYSTEMS FOR MORE EFFICIENT USE OF ELECTRICITY, FOSSIL FUELS, AND OTHER ENERGY SOURCES FOR AGRICULTURAL PRODUCTION. DETERMINE THE ENERGY REQUIREMENTS FOR PERFORMING SELECTED AGRICULTURAL OPERATIONS IN SOUTH DAKOTA. INVESTIGATE METHODS OF SUBSTITUTING ENERGY SOURCES, SUCH AS, SOLAR AND WIND, FOR AGRICULTURAL SYSTEMS CURRENTLY USING CONVENTIONAL ENERGY SOURCES. STUDY THE EFFECTS OF MANAGEMENT AND CONTROL ON ENERGY USE FOR AGRICULTURAL PRODUCTION.

APPROACH: COLD AIR CROP DRYING AND SOLAR SUPPLEMENTED CROP DRYING STUDIES WILL BE CONDUCTED ON THE AGRICULTURAL ENGINEERING FARM. LOW TEMPERATURE, LOW COST SOLAR COLLECTORS WILL BE INVESTIGATED AS A SOURCE OF SUPPLEMENTAL HEAT FOR CONFINEMENT LIVESTOCK BUILDINGS. WORK WILL BE PERFORMED TO DEVELOP A MULTI-PURPOSE SOLAR-INTENSIFIER-THERMAL STORAGE SYSTEM FOR AGRICULTURAL USES.

PROGRESS: A COMPUTER SIMULATION MODEL, BASED ON REQUIRED VENTILATION RATES, BUILDING CHARACTERISTICS AND LIVESTOCK ENVIRONMENTAL CONSIDERATIONS, WAS DEVELOPED. FOR BROOKINGS, SOUTH DAKOTA CLIMATIC CONDITIONS AN OVERALL THERMAL RESISTANCE VALUE OF APPROXIMATELY 12 HR-FT F/RTU IS OPTIMUM AT CURRENT ENERGY AND INSULATION PRICES. DATA HAVE BEEN DEVELOPED ON ENERGY COSTS FOR TYPICAL MONTHS OF OPERATION AND FOR THE EFFECTS OF LIVESTOCK DENSITY AND ENVIRONMENTAL TEMPERATURE. A \$45,001 RESEARCH GRANT WAS RECEIVED FROM ERDA TO STUDY A SOLAR ENERGY-INTENSIFIER-THERMAL STORAGE SYSTEM FOR DRYING AGRICULTURAL PRODUCTS AND FOR AGRICULTURAL SPACE HEATING. STUDIES OF SELECTED TYPE OF LOW COST, LOW TEMPERATURE RISE SOLAR COLLECTORS, MOUNTED ON THE SOUTHERN TWO-THIRDS OF CONVENTIONAL SHELLD CORN DRYING BINS, INDICATE THAT BARE COLLECTORS

CAN BE AS EFFICIENT AS COVERED FLAT-PLATE COLLECTORS. ECONOMICS AND ENERGY SAVINGS HAVE BEEN NOTED FOR SOLAR SUPPLEMENTED VERSUS CONVENTIONAL LOW-TEMPERATURE CORN THREE GEOMETRIC CONFIGURATIONS OF LOW COST, LOW-TEMPERATURE RISE SOLAR COLLECTORS USED TO PROVIDE SUPPLEMENTAL HEAT FOR A CLOSED CONFINEMENT BEEF BUILDING.

ABSTRACT

IN THE UNITED STATES, THE FIRST STEP TOWARD THE REALIZATION OF LARGE-SCALE AGRICULTURAL SYSTEMS UTILIZING PHOTOVOLTAICS WAS MADE DURING THE SUMMER OF 1977 BY THE CONSTRUCTION AND OPERATION OF AN EXPERIMENTAL UNIT GENERATING APPROXIMATELY 25-KW PEAK POWER. THIS EXPERIMENT WILL TEST THE APPLICATION OF SOLAR ENERGY TO A VARIETY OF AGRICULTURAL TASKS, INCLUDING IRRIGATION AND CROP DRYING. DURING THE PAST SUMMER, THIS UNIT POWERED A 10-HORSEPOWER PUMP THAT WAS INTERCONNECTED WITH AN AUTOMATIC GATED-PIPE IRRIGATION NETWORK AND A RESERVOIR OF TWO ACRE-FEET CAPACITY. IT WAS DESIGNED TO IRRIGATE 80 ACRES OF CORN, 12 HOURS A DAY AT THE RATE OF 1000 GALLONS A MINUTE. IN EARLY OCTOBER, AFTER THE END OF THE IRRIGATION SEASON, THE POWER WAS SWITCHED TO NEARBY CORN-DRYING BINS WHERE A FORCED-AIR DRYING TECHNIQUE IS BEING TESTED UTILIZING PHOTOVOLTAIC-POWERED CIRCULATION FANS. TWO GRAIN BINS, EACH WITH A 5-HORSEPOWER FAN, HAVE BEEN SET UP NEAR THE SOLAR COLLECTOR TO DRY THE CROP. ELECTRICITY GENERATED BY THE SOLAR UNIT IS USED TO POWER THE FAN FOR IN-BIN DRYING OF THE GRAIN.

ABSTRACT

THE TECTONIC MAP OF THE OVERTHRUST BELT WAS CONSTRUCTED TO DEPICT THE MAJOR FAULTS AND STRUCTURES PRESENT IN THIS IMPORTANT NEW OIL AND GAS PROVINCE. PERTINENT INFORMATION RELATED TO THE OIL AND GAS DEVELOPMENT IS SHOWN - FOR EXAMPLE, ALL NEW OIL AND GAS FIELDS THROUGH MARCH OF 1979 ARE PLOTTED ALONG WITH THE UNSUCCESSFUL EXPLORATORY TESTS DRILLED IN THE AREA. THIS MAP REPRESENTS AN IMPORTANT NEW TOOL FOR THE STUDY OF THE OVERTHRUST BELT ON A REGIONAL BASIS, AS WELL AS, PROVIDING THE USER WITH AN INSIGHT INTO THE DRILLING HISTORY OF THE AREA.

ABSTRACT

OBJECTIVE: CALCULATE THE WIND ENERGY AVAILABLE AT SELECTED SITES IN SD. STUDY THE INTENSITY AND VARIATION IN THIS ENERGY ON A DAILY AND MONTHLY BASIS. STUDY THE RELATIVE POTENTIAL OF WIND ENERGY AS COMPARED TO OTHER ALTERNATE ENERGY SOURCES. EVALUATE THE COMBINED POTENTIAL OF WIND AND SOLAR ENERGIES AT SELECTED SITES IN SOUTH DAKOTA. INVESTIGATE THE POTENTIAL OF WIND ENERGY FOR AGRICULTURAL APPLICATIONS.

APPROACH: THE MAIN THRUST WILL BE TOWARD THE FEASIBILITY OF WIND ENERGY USE FOR AGRICULTURAL APPLICATIONS SUCH AS, CROP DRYING, GRAIN DRYING, AND SPACE HEATING. EXISTING CLIMATOLOGICAL DATA AT VARIOUS LOCATIONS IN SD WILL BE EVALUATED FOR WIND ENERGY POTENTIAL INCLUDING WIND VARIATION STUDIES. SOME SPECIFIC ANALYSIS WILL BE MADE ON THE AVAILABILITY OF WIND POWER FROM DATA. THE TOTAL WIND ENERGY FLUX PASSING UNIT AREA FOR EACH MONTH OF THE YEAR, AVERAGE DAILY WIND ENERGY FLUX, THE DISTRIBUTION IN TIME OF THE AVAILABLE WIND ENERGY, NUMBER OF HOURS PER MONTH WITH WIND SPEEDS ADEQUATE FOR EFFECTIVE WIND ENERGY CONVERSION, DETAILS ABOUT THE INCIDENCE AND DURATION OF CALM PERIODS. RESULTS OBTAINED TO BE USED IN COMBINATION WITH AVAILABLE SOLAR ENERGY INFORMATION TO EVALUATE THE COMBINED POTENTIAL OF WIND AND SOLAR ENERGIES IN SD.

LOCATION

MT

ABSTRACT

MONTANA POWER COMPANY HAS BEGUN A STUDY WITH A CONSULTANT TO RE-EXAMINE THE UNDEVELOPED HYDROELECTRIC POTENTIAL IN ITS SERVICE AREA IN THE LIGHT OF TODAY'S ECONOMICS, ENVIRONMENTAL AND POLITICAL RESTRAINTS. IN ADDITION, MONTANA POWER HAS BEGUN A STUDY TO RE-EXAMINE EXISTING HYDROELECTRIC SITES TO DETERMINE IF FURTHER HYDRO-ELECTRIC ENERGY COULD BE DEVELOPED ECONOMICALLY.

U. S. CORPS OF ENGINEERS

PRIMARY FUNDING AMOUNT

FY79 - \$255 FY80 - \$500 - TOTAL UNKNOWN

TIME FRAME

CONTINUING TO 1982

LOCATION

SD / NE / ND / MT / MISSOURI RIVER

ABSTRACT

THE OMAHA DISTRICT OF THE CORPS OF ENGINEERS HAS INITIATED THE

RESUMPTION OF THE HYDROPOWER PORTION OF THE MISSOURI RIVER, SOUTH DAKOTA, NEBRASKA, NORTH DAKOTA, AND MONTANA STUDY (UPPER MISSOURI RIVER UMBRELLA STUDY). THE UPPER MISSOURI RIVER UMBRELLA STUDY INVESTIGATED A WIDE RANGE OF WATER RESOURCE PROBLEMS AND OPPORTUNITIES ON THE MISSOURI RIVER. THE REVIEW REPORT ON THE UMBRELLA STUDY WHICH IS NOW UNDER REVIEW AT THE OFFICE, CHIEF OF ENGINEERS, RECOMMENDED AUTHORIZATION FOR PHASE 1 ADVANCED ENGINEERING AND DESIGN STUDIES FOR (1) ADDITIONAL HYDROPOWER GENERATING UNITS AND REREGULATION DAMS AT GARRISON DAM IN NORTH DAKOTA AND FORT PECK DAM IN MONTANA, (2) A PUMPED-STORAGE HYDROELECTRIC GENERATING FACILITY ADJACENT TO LAKE FRANCIS CASE IN GREGORY COUNTY, SOUTH DAKOTA, (3) BANK STABILIZATION AT 30 AREAS OF ACTIVE EROSION BETWEEN FORT PECK DAM AND PONCA, NEBRASKA, (4) FISH REARING PONDS AT 12 SITES AT LAKE OAKE AND LAKE FRANCIS CASE, AND (5) DESIGNATION OF A 59-MILE REACH OF THE MISSOURI RIVER BETWEEN GAVINS POINT DAM AND PONCA, NEBRASKA AS A NATIONAL RECREATION RIVER. BASED ON THE REVIEW AND RECOMMENDATIONS OF THE BOARD OF ENGINEERS FOR RIVERS AND HARBORS THE REPORT NO LONGER CONTAINS SPECIFIC RECOMMENDATIONS FOR BANK STABILIZATION MEASURES. ALSO, PUBLIC LAW 95-625 WAS RECENTLY ENACTED WHICH DESIGNATED THE MISSOURI RIVER FROM GAVINS POINT DAM TO PONCA, NEBRASKA AS A NATIONAL RECREATION RIVER; THEREFORE, THE REPORT OF THE CHIEF OF ENGINEERS TO CONGRESS WILL NOT CONTAIN A RECOMMENDATION FOR THE RECREATION RIVER DESIGNATION. THE REPORT DEFERRED FURTHER CONSIDERATION OF OTHER ADDITIONAL HYDROPOWER OPPORTUNITIES AT THE MAIN STEM RESERVOIRS ON THE MISSOURI RIVER. OUR STUDY RESUMPTION IS REFERRED TO AS "MISSOURI RIVER, SOUTH DAKOTA, NEBRASKA, NORTH DAKOTA, AND MONTANA (ADDITIONAL HYDROPOWER)." THE STUDY WILL BE CONDUCTED OVER A FOUR-YEAR PERIOD AND WILL FOCUS ON THE FUTURE NEED AND FEASIBILITY OF ADDITIONAL HYDROELECTRIC DEVELOPMENT INCLUDING PUMPED-STORAGE HYDROPOWER ADJACENT TO THE MAIN STEM RESERVOIRS.

ABSTRACT
STUDY OBJECTIVE IS TO COMPLY WITH 9 PROVISIONS OF SEC. 167,
PL 94-587, VIZ. TO STUDY: (1) THE PHYSICAL POTENTIAL FOR
HYDROELECTRIC DEVELOPMENT; (2) THE MAGNITUDE AND REGIONAL
DISTRIBUTION OF NEED FOR HYDROPOWER; (3) INTEGRATION
OF HYDRO AND OTHER FORMS OF GENERATION; (4) MEASURES
TO ASSURE THAT HYDRO WILL BE EFFICIENT IN MEETING
NATIONAL ENERGY DEMANDS; (5) TIMING OF HYDRO TO COINCIDE
WITH CHANGES IN DEMAND; (6) CONVENTIONAL HYDRO POTENTIAL,
POSSIBLE ADVANCES IN TECHNOLOGY, AND PUMPED STORAGE
POTENTIAL; (7) FEASIBILITY OF ADDING OR REALLOCATING
STORAGE AND MODIFYING OPERATING RULES OR CORPS PROJECTS
WITH POWER; (8) MEASURES TO INSURE THAT POTENTIAL
CONTRIBUTIONS OF HYDRO ARE REALIZED TO THE MAXIMUM;
(9) OTHER PERTINENT FACTORS NECESSARY.

ABSTRACT
THE RESULTS OF A STUDY OF THE FEASIBILITY OF CONVERTING
AGRICULTURAL RESIDUES TO PRODUCE ENERGY ARE PRESENTED.
RESULTS OF ON-SITE SURVEYS OF TEN STUDY AREAS SELECTED
FOR ANALYSIS ON THE BASIS OF A PREVIOUS SRI COUNTY-BY-
COUNTY INVENTORY OF THE QUANTITY AND AVAILABILITY OF
RESIDUES PRODUCED WITHIN THE CONTINENTAL UNITED STATES
ARE GIVEN. TWO IMPORTANT FACTORS IN DETERMINING THE
FEASIBILITY OF RESIDUE CONVERSION TO ENERGY ARE PRICE
AND AVAILABILITY OF THE RESIDUES. EIGHT OF THE TEN
STUDY AREAS HAVE SIGNIFICANT QUANTITIES OF RELATIVELY
LOW-COST RESIDUES. THREE CURRENTLY AVAILABLE PROVEN
TECHNOLOGIES, PROCESS STEAM PRODUCTION, ELECTRIC POWER
GENERATION, AND ANAEROBIC DIGESTION OF RESIDUES TO
PRODUCE METHANE GAS, ARE THE MOST ECONOMICALLY FEASIBLE
CONVERSION POSSIBILITIES. RESIDUE CONVERSION BY THESE
TECHNOLOGIES IS FREQUENTLY COST-COMPETITIVE WITH ENERGY
PRODUCTION AT NEW FACILITIES FUELED WITH OIL, PROPANE,
COAL, OR NATURAL GAS. (ERA CITATION 03:030558)

ABSTRACT

THIS REPORT ASSESSES THE ENERGY SUPPLY AND GROUNDWATER
SITUATIONS FOR IRRIGATION IN TEXAS, OKLAHOMA, KANSAS,
AND NEBRASKA. THE HIGHLY SEASONAL DISTRIBUTION OF
ELECTRICITY DEMAND FOR IRRIGATION CREATES A PEAK LOAD
PROBLEM FOR ELECTRICITY COOPERATIVES IN THE REGION.
THIS PROBLEM IS MOST SERIOUS IN NEBRASKA, WHERE IT HAS
LED TO RESTRICTIONS OR DELAYS IN NEW IRRIGATION HOOKUPS.
A SURVEY OF AVAILABLE DATA ON SATURATED THICKNESS
OF THE AQUIFER, DEPTH TO WATER TABLE, AND ANNUAL
RATE OF DECLINE (OR RISE) IN THE WATER TABLE WAS CONDUCTED
FOR COUNTIES IN THE FOUR STATES OVERLYING THE OGALLALA
FORMATION. THE MOST SERIOUS PROBLEMS ARE IN TEXAS,
WHICH HAS THE GREATEST AVERAGE DEPTH TO THE WATER TABLE,
THE GREATEST AVERAGE YEARLY WATER TABLE DECLINE, AND
THE LOWEST AVERAGE SATURATED THICKNESS.

ABSTRACT

THE OBJECTIVE OF PHASE I OF THIS STUDY WAS TO DETERMINE THE POTENTIAL FOR ELECTRICAL/PROCESS STEAM COGENERATION CAPACITY WITHIN 150 PLANTS IN WASHINGTON, OREGON, AND IDAHO. THE BONNEVILLE POWER ADMINISTRATION CONTRACTED WITH ROCKET RESEARCH COMPANY TO AUGMENT A PACIFIC NORTHWEST REGIONAL COMMISSION STUDY ON "INDUSTRIAL WASTE HEAT FOR ADJACENT COMMUNITIES AND INDUSTRIAL APPLICATIONS" SO THAT THE COGENERATION POTENTIAL COULD BE DETERMINED CONCURRENTLY. CONSEQUENTLY, THE PLANTS CHOSEN FOR THE PHASE I STUDY WERE SELECTED ON THE BASIS OF WASTE HEAT POTENTIAL AND NOT FOR OPTIMUM COGENERATION POTENTIAL. IN ADDITION, BPA UNDERTOOK A SEPARATE STUDY TO ASSESS THE COGENERATION POTENTIAL IN 17 INDUSTRIES IN WESTERN MONTANA.

THE BPA STUDY WAS BROKEN DOWN INTO FOUR PHASES. PHASE I HAS BEEN TO DETERMINE THE AMOUNT OF TECHNICALLY ACHIEVABLE COGENERATION POTENTIAL AVAILABLE FROM PACIFIC NORTHWEST INDUSTRIES; PHASE II WAS THE WESTERN MONTANA STUDY PERFORMED BY BPA AND THE STATE OF MONTANA; AND PHASE III IS THE ECONOMIC ANALYSIS OF THE 10 SAMPLE PLANTS REPRESENTING THE MAJOR INDUSTRIAL SECTORS WITH THE BEST COGENERATION POTENTIAL OF THE 20 BEING STUDIED IN TASK III OF THE PNRC PROGRAM. PHASE IV WILL INCLUDE AN ASSESSMENT OF THE DERIVED COGENERATION POTENTIAL OF ABOUT 450 PLANTS NOT SURVEYED AND A DETAILED ANALYSIS OF SIX PLANTS/PLANT CLUSTERS.

REPORTS AND PUBLICATIONS

INDUSTRIAL ELECTRICAL COGENERATION POTENTIAL IN THE BONNEVILLE POWER ADMINISTRATION SERVICE AREA.

ABSTRACT

THE NUCLEAR ENERGY CENTER SITING OPPORTUNITIES IN THE ELEVEN WESTERN STATES HAVE BEEN SYSTEMATICALLY EXAMINED. THE STUDY AREA HAS BEEN DIVIDED INTO 10-MILE BY 10-MILE GRID CELLS, AND EACH CELL HAS BEEN EVALUATED IN TERMS OF OVERALL SUITABILITY AND SITE-RELATED COSTS. COMPOSITE SUITABILITY CONSISTS OF A WEIGHTED SUM OF OF TEN IMPORTANT NUCLEAR POWER PLANT SITING ISSUES: THE PARTICULAR WEIGHTS USED FOR THIS STUDY WERE DECIDED BY A DELPHI SESSION OF TWENTY INDIVIDUALS WITH ENERGY FACILITY SITING EXPERTISE, WITH AT LEAST ONE REPRESENTATIVE FROM EACH OF THE ELEVEN WESTERN STATES. SITE-RELATED COSTS CONSIST OF THE ADDITIONAL EXPENDITURES REQUIRED FOR SEISMIC HARDENING (IN SEISMICALLY ACTIVE AREAS), ELECTRIC POWER TRANSMISSION LINES (FOR SITES SIGNIFICANTLY FAR FROM LOAD CENTERS), AND WET/DRY COOLING SYSTEM COSTS (LIMITED WATER AVAILABILITY AND/OR HIGH SUMMER TEMPERATURES). (ERA CITATION 03:040341)

ABSTRACT

THE POTENTIAL FOR CONSERVATION TO REDUCE FORECASTED ELECTRIC
ENERGY NEEDS IN THE PACIFIC NORTHWEST IS ANALYZED IN THIS
STUDY. TO DEMONSTRATE THIS POTENTIAL, THE STUDY EXAMINES
THE ENERGY SAVINGS AND IMPACTS FOR A VARIETY OF CONSERVATION
STRATEGIES, RANGING FROM A MINIMUM TO A MAXIMUM EFFORT.
THE STRATEGIES OUTLINE THE STEPS THAT STATE, LOCAL AND
FEDERAL GOVERNMENTS CAN TAKE TO ENCOURAGE ADOPTION OF
SPECIFIC CONSERVATION MEASURES. NONE OF THE MEASURES
REQUIRE CURTAILMENT OF ENERGY-USING PRACTICES. ENERGY
CONSERVATION IS DEFINED IN THE STUDY AS IMPROVING THE
EFFICIENCY OF ENERGY USE. THE POTENTIAL FOR CONSERVATION
IN THE REGION RANGES FROM 5 TO 33 PERCENT OF THE 1995
FORECAST DEMAND.

ABSTRACT

DESCRIPTION: THE MONTANA ENERGY OFFICE HAS, AS ONE OF
ITS PRIMARY FUNCTIONS, THE RESPONSIBILITY FOR COORDINATION
OF ENERGY-RELATED RESEARCH ACTIVITIES WITHIN STATE
GOVERNMENT. IN PARTIAL FULFILLMENT OF THIS RESPONSIBILITY,
MEO HAS ESTABLISHED THE MONTANA ENERGY RESEARCH
INVENTORY WHICH IS USED TO KEEP TRACK OF ALL ONGOING
AND RECENTLY COMPLETED ENERGY RESEARCHING OCCURRING IN
OR FOR MONTANA. THE ENERGY RESEARCH INFORMATION INVENTORY
PROVIDES A NECESSARY INFORMATION TOOL FOR RESEARCHERS,
STATE GOVERNMENT PLANNERS AND DECISION MAKERS, AND OTHERS
INVOLVED IN ENERGY ACTIVITIES. BY MAINTAINING A CENTRAL,
COMPREHENSIVE AND UP-TO-DATE INVENTORY OF ENERGY-RELATED
RESEARCH, MEO HOPES TO: (1) ENHANCE COMMUNICATION
AMONG ENERGY RESEARCHERS; (2) AVOID UNNECESSARY DUPLICA-
TION OF EFFORTS; (3) HELP FUNDING AGENCIES PINPOINT AREAS
OF ADDITIONAL RESEARCH NEEDS; AND (4) PERMIT THE EFFECTIVE
UTILIZATION OF RESEARCH BY INTERESTED PERSONS. TO
ACCOMPLISH THE ABOVE STATED OBJECTIVES, THE ENERGY
RESEARCH INVENTORY (1) MAINTAINS AN ENERGY RESEARCH
MATRIX BOARD, WHICH IS CONTINUOUSLY UPDATED, FOR

BEST DOCUMENT AVAILABLE

QUICK REFERENCE TO INFORMATION ON MONTANA ENERGY RESEARCH;
(2) MAINTAINS RESEARCH INFORMATION FILES; (3) PREPARES AN

ANNUAL PUBLICATION IN WHICH ALL PROJECT INFORMATION IS
SUMMARIZED IN A COMPREHENSIVE REPORT; AND (4) PROVIDES
A SEARCH AND REFERRAL SERVICE FOR INDIVIDUALS WHO WISH
TO OBTAIN UP-TO-DATE INFORMATION ON THE STATUS OF ANY
PROJECT.

ABSTRACT

DURING THE PAST YEAR, SEVERAL OF THE MAJOR INDUSTRIAL
ELECTRICAL CONSUMERS HAVE BEEN ASKED TO REVIEW THEIR
INDUSTRIAL PROCESSES TO DETERMINE THE FEASIBILITY OF
ELECTRICAL CO-GENERATION. IT IS PLANNED THAT ALL MAJOR
INDUSTRIAL CUSTOMERS WILL BE CONTACTED TO EVALUATE
IF ELECTRICAL CO-GENERATION IS POSSIBLE. PRESENTLY
MONTANA POWER CO. HAS ONE CO-GENERATION CUSTOMER IN
ITS SYSTEM, AND IT IS HOPED THAT THIS NUMBER CAN BE
EXPANDED.

TIME FRAME

JUNE 1978 TO DECEMBER 1979

LOCATION

U. S. & INCLUDES DISAGGREGATING FORECASTED ENERGY SUPPLY
DEMAND DATA INTO 173 BEA (BUREAU OF ECONOMIC ANALYSIS)
GEOGRAPHICAL REGIONS.

ABSTRACT

THE OBJECTIVE OF THIS STUDY IS TO DETERMINE THE ABILITY
OF THE NATION'S TRANSPORTATION

SYSTEM TO MOVE THE ENVISIONED MIX OF ENERGY SUPPLIES TO MARKET TO 1985 AND BEYOND. IT COVERS ALL ENERGY TYPES AND

ALL TRANSPORTATION MODES. BASED ON PROJECTED ENERGY SUPPLY & DEMAND FUTURES, THE STUDY WILL SEE WHAT ADDITIONS TO RAIL, PIPELINE, MARINE AND TRUCK CAPACITY MAY BE NEEDED AND THE ABILITY OF EACH TRANSPORTATION MODE TO FINANCE THESE CAPACITY ADDITIONS. THE STUDY IS ALSO LOOKING AT A NUMBER OF ISSUES RELATING TO ENERGY TRANSPORTATION. EXAMPLES INCLUDE USE OF COAL SLURRY PIPELINES, PIPELINE TARIFFS, & THE IMPACT OF INCREASED COAL UNIT-TRAIN TRAFFIC ON LOCAL COMMUNITY ENVIRONMENTS.

SUBJECT INDEX

**THE TERMS LISTED IN THE SUBJECT INDEX ARE
TAKEN FROM THESAURI OF ENERGY DESCRIPTORS
AND SUPPLEMENTED BY TERMS FROM THE TITLE
AND ABSTRACT OF THE PROJECT DESCRIPTION.**

**IN ADDITION, THE SUBJECT INDEX CONTAINS
LOCATION NAMES SUCH AS CITIES, COUNTIES,
MINE SITES, RIVER BASINS, AND GEOGRAPHIC
FORMATIONS. STATE LOCATION NAMES CAN BE
FOUND IN THE LOCATION INDEX.**
